

Eva Marie Janelo

Scandinavian laser acupuncture expert

Are you running an acupuncture school and looking for someone who can give your students knowledge of laser acupuncture?

I have been practicing Chinese medicine and medical laser since 2002. Early in my career

I became very curious about how laser activates the acupuncture system and began to investigate how different laser wavelengths stimulated acupuncture points in different ways.

In collaboration with the Swedish laser manufacturer Irradia, I have been involved in developing equipment specifically for laser acupuncture.

Over the past ten years, I have also trained acupuncturists in Scandinavia in laser acupuncture.

Would you like me to come to your acupuncture school or to your conference? Feel free to contact me!

Eva-Marie Janelo
Practitioner of Chinese medicine and medical laser

Eva Marie Janelo

Scandinavian laser acupuncture expert.

References

Eva-Marie Janelo is a very committed and highly skilled speaker, who very well manage to explain what laser acupuncture is and on what conditions it can be used. I can really recommend the laser acupuncture lecture with Eva-Marie Janelo!

*Eva Solstrand,
Dr of Chiropractic, IVCA-certified Animal Chiropractor*

I attended Eva-Marie's course in laser acupuncture in April 2019 and I highly recommend it to anyone interested in laser therapy combined with traditional Chinese acupuncture. As a lecturer, Eva-Marie was enthusiastic and her wisdom, combined with great knowledge and experience in treating both humans and animals, was very confidence inspiring.

*Elin Christiansson,
Canine physiotherapist and student of TCM canine acupuncture*

Highly recommend you to attend Eva-Marie's Laser Acupuncture course! Both for beginners and for those who have practiced acupuncture for a while.

I myself -an acupuncturist- have had a laser for a few years, but needed a boost. Now I use my laser much more again - it just took a very interesting day with Eva-Marie to get there. I loved it!

Gun Heed, Acupuncturist, Sweden
